MISSION

“Compliance with compassion”

The mission of Disability Management Services is to provide early intervention services when illness, disability or injury occurs and to assist faculty and staff with retention through reasonable job accommodation.

This program provides assistance for a return to productive employment for members of our diverse campus community who are chronically ill, physically and/or psychologically disabled, thereby reducing the impact of disability in the workplace.

We are committed to providing disability management services, technical assistance and consultation with the highest degree of integrity to the campus community to ensure all members have equal opportunity to work in a healthy and safe environment.

AVAILABLE SERVICES

Purpose
This University program is available to assist faculty and staff to remain working or to return to work when a medical condition or disability interferes with the ability to perform job duties.

Goals
The University recognizes that faculty and staff prefer to remain at work, earning full income and gaining satisfaction from what they do.

Eligibility
This program is free of charge and is available to all employees with a documented medical condition or a disability which interferes with the ability to perform his/her job.

Services
- Disability Management Services (DMS) provides technical assistance and consultation to departments and employees
- If an employee has a medical condition or disability that impacts their ability to work, they may speak with a DMS counselor about medical limitations or restrictions and discuss accommodations which may assist them to remain working
- There may be an option of taking a leave of absence and returning to work after a leave in a modified capacity if medically necessary

Developing Accommodations
A DMS counselor will work with the employee and their physician to document limitations or restrictions; DMS will then meet with the employee and their department to discuss possible accommodations. Based on the medical limitations, accommodation may include:
- Ergonomic adjustments to work stations
- Assistive devices and accessible technology
- Modified work schedules
- Restructuring of work tasks
- Modification of the work site or existing facilities
- Arranging medical leaves of absence
- Reassignment to open vacant positions for which the employee is minimally qualified
